Customization

Modifying Colors

Update the CSS custom properties in the root selector to change the color scheme throughout the site.

Adding Products

Clone the existing product-card HTML structure and update the image src, product name, and price information.

Layout Changes

Modify the CSS Grid and Flexbox properties to adjust layouts. All responsive breakpoints are clearly defined in the CSS file.

Best Practices Implemented

- ✓ Semantic HTML5 elements for better accessibility
- ✓ CSS-only responsive design without JavaScript
- ✓ Mobile-first responsive approach
- ✓ Optimized images with proper alt attributes
- ✓ Clean, maintainable CSS structure
- ✓ Cross-browser compatibility
- ✓ Fast loading with minimal dependencies
